EDUCATION

Pune Institute of Computer Technology
B.E. in Electronics and Telecommunication

May 2023 – June 2027
CGPA: 9.68

EXPERIENCE

Script Lanes
Full Stack Developer Intern

June 2025 – April 2026
Hybrid, Pune, India

- Built **20+ REST APIs** (Node.js, TypeScript, Prisma, PostgreSQL) powering **OrthoAI** and **FlourishAI**, two AI-driven healthcare assistants.
- Designed a **RAG pipeline** using **LangChain** and a vector database, enabling context-aware responses, reducing hallucinations, and improving retrieval efficiency.
- Collaborated with a cross-functional team to ship features into production on a biweekly release cycle.

PROJECTS

AI Voice Agent for Partner Lead Conversion – *Next.js, Node.js, Ollama, Pinecone, PostgreSQL*

- Built an **end-to-end multilingual voice agent** (Deepgram STT → Ollama LLM → Sarvam AI TTS) for real-time, low-latency lead conversations.
- Engineered a **RAG pipeline** with Pinecone for grounded objection handling, plus agentic workflows for lead scoring, conversation memory, and automated RM handoff with AI-generated call summaries.
- Shipped a **Next.js + PostgreSQL** analytics dashboard for transcript review and lead pipeline tracking.

StackWise – *React, TypeScript, Node.js, Supabase, Pinecone, AWS*

- Built an AI-powered platform that aggregates and summarizes engineering blogs from companies like Google, Netflix, Meta, AWS, and Stripe into **1000+** concise, citable summaries.
- Designed a **RAG ingestion pipeline** (Node.js, Pinecone, Supabase/PostgreSQL) to automatically fetch, embed, and summarize long-form articles at scale.
- Added an **AI-generated podcast feature** that converts summarized blogs into listenable audio episodes, extending content reach beyond text.

Udemy-RAG – *Python, Node.js, RAG, Web Scraping*

- Built an AI course assistant that scrapes enrolled Udemy course resources (PDFs, code, slides) into a private vector knowledge base, then answers revision questions via a citation-backed RAG chatbot.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, HTML

Frameworks/Databases: React, React Native, Node.js, Next.js, Prisma, MySQL, MongoDB, PostgreSQL, Tailwind CSS

AI/ML: LangChain, RAG, Vector Databases (Pinecone), AnythingLLM

Tools/Platforms: Git, GitHub, Postman, Swagger, Figma, AWS, Azure, Google Cloud

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming

EXTRACURRICULAR AND ACHIEVEMENTS

- **Tech Head**, college flagship hackathon **Techfiesta '26**
- **Rank 44/1000+** (by accuracy) – Bajaj Finserv **HackRx '25**
- **Top 100** – Google **GenAI Exchange Hackathon '25**
- **Top 10/500+** teams – **i.mobilothon 5.0** by Volkswagen
